

POLO SHIRT

PS240M & PS240F

PRODUCT DESCRIPTION

The PS240 is a premium hi-visibility polo shirt designed to deliver dependable protection, comfort and durability for workers operating in hazardous environments.

Manufactured from a 245gsm FR fabric blend incorporating modacrylic, polyester, cotton and anti-static fibres, the garment offers inherent flame-resistant performance alongside excellent breathability and moisture management.

A contrast collar provides additional neck protection, while ribbed cuffs and an improved fit ensure all-day comfort. The concealed stud placket prevents hardware from contacting the skin, and FR HEX stretch reflective tape enhances visibility with shoulder and torso band placement. Certified to key flame-resistant, anti-static and high-visibility standards, the PS240 achieves an 8.1cal/cm² ATPV rating and 6.8cal/cm² ELIM protection.
