

TWO-TONE COMBAT TROUSER

TR257

PRODUCT DESCRIPTION

The two-tone TR257 work trousers are designed for maximum protection, durability and comfort in high-risk working environments. They are made from ProGARM® ripstop outer fabric and plain weave, offering robust arc and flame resistance while maintaining freedom of movement thanks to their ergonomic fit and pre-shaped knees.

Practical features include multiple secure pockets, reinforced stress points and FR zips for added strength. The trousers feature high-visibility accents and reflective stripes, making them a reliable choice for the utility, electrical and industrial sectors.

TWO-TONE COMBAT TROUSER

TR257

FEATURES & BENEFITS

- ✓ Shaped rear waistband for improved coverage and comfort
- ✓ Concealed swivel front fastening
- ✓ Covered flap hip pockets for protection against molten metal splashes and chemical exposure
- ✓ FR Spiral zip for increased strength and durability
- ✓ Reinforced gusset for increased durability and longevity in high stress area
- ✓ Bellowed combat pocket for extra storage, including dedicated phone pocket and concealed FR heat resistant D-ring
- ✓ Ruler pocket with flap for secure storage
- ✓ Top loading reinforced kneepad pocket with positional bar tacks
- ✓ Pre-bent knees for ease of movement
- ✓ Triple needle stitching for superior seam strength
- ✓ Backed by ProGARM Seam Guarantee
- ✓ Reinforced hems
- ✓ Seven belt loops including an oversized centre back loop to help prevent belt ride up
- ✓ SafetyICON™ with Arc Class and ELIM rating for clearer visibility
- ✓ FR HEX industrial wash 100x reflective tape

FABRIC SPECIFICATION:

- ✓ VXS+ Inherent Ripstop/Elastane, 265gms

PRODUCT CARE:

- ✓ Maximum washing temp 60°C
- ✓ Drying temperature: up to 60°C
- ✓ Ironing: Medium temperature
- ✓ Dry cleaning permitted
- ✓ Do not use bleach

Concealed swivel front fastening

Spacious bellow pockets

Oversized centre back loop to help prevent belt ride up

MEASURING GUIDE

Measurements must be taken wearing clothing usually worn underneath waterproof outerwear. The tape measure should be fairly loose and not pulled too tight:

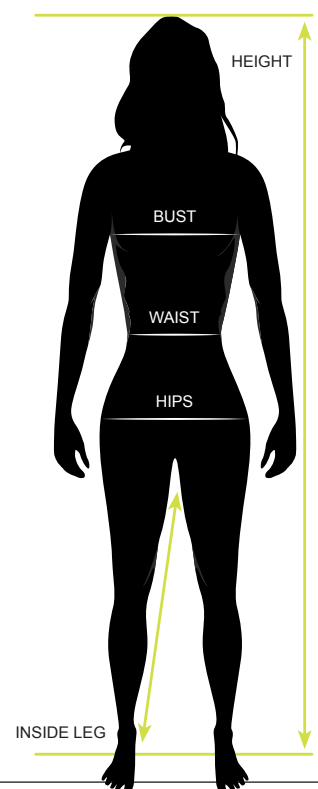

- ✓ **WAIST** - measure around the natural waistline at the fullest part
- ✓ **HIP** - with the feet together measure around fullest part of the hips
- ✓ **HEIGHT** - with bare feet together measure from the top of the head to the floor
- ✓ **INSIDE LEG** - in bare feet take the measurement from the top of the inside leg and measure down the inside leg to the floor

When fitting the Trousers if the waist and seat measurements fall into different size categories then choose the larger size to ensure the trousers are not too close fitting.

If the height and inside leg measurements fall into different length categories then choose the jacket length based on the height measurement and the trouser length based on the inside leg measurement.

**These styles are historically perceived as FEMALE but can be worn by any person who's body measurements fit into the above tables.*

***Please note when using the measurement tables that all manufacturing tolerances and standard garment over-measures have been taken into account. This ensures any slight variances in manufacture or fabric shrinkage after washing will not affect the fit of the garments.*

MEASURING GUIDE

Measurements must be taken wearing clothing usually worn underneath waterproof outerwear. The tape measure should be fairly loose and not pulled too tight.

- ✓ **CHEST/BUST** - measure under the arms at the fullest part around the chest horizontally with arms by your side
- ✓ **WAIST** - measure around the natural waistline at the fullest part
- ✓ **SEAT/HIP** - with the feet together measure around fullest part of the hips
- ✓ **HEIGHT** - with bare feet together measure from the top of the head to the floor
- ✓ **INSIDE LEG** - in bare feet take the measurement from the top of the inside leg and measure down the inside leg to the floor

Once measurements are taken compare them to the fit guide measurement tables to find your garment size.

When fitting the trouser if the waist and seat measurements fall into different size categories then choose the larger size to ensure the trouser is not too close fitting.

If the height and inside leg measurements fall into different length categories then choose the jacket length based on the height measurement and the trouser length based on the inside leg measurement.

Please note when using the measurement tables that all manufacturing tolerances and standard garment over-measures have been taken into account. This ensures any slight variances in manufacture or fabric shrinkage after washing will not affect the fit of the garments.
